SECTION 01

Introduction & About Aerchain

Aerchain is pleased to present this proposal to Al-Futtaim Group to drive procurement excellence across your UAE and KSA operations. As a diversified conglomerate with a massive footprint in automotive, retail, and real estate, Al-Futtaim requires a procurement engine that matches its scale. Our i2a (Indent-to-Award) platform is uniquely positioned to digitize your sourcing workflows, ensuring that every dirham and riyal spent is optimized through AI-driven intelligence rather than manual oversight.

By integrating seamlessly with your Oracle Fusion ERP, Aerchain will eliminate the data silos currently existing between procurement activities and financial records. This transformation will empower Ahmed Al-Mansouri and the leadership team with real-time visibility into vendor performance and spend analytics across the Middle East. Our goal is to shift Al-Futtaim's procurement from a back-office function to a strategic value driver, leveraging our autonomous negotiation capabilities to deliver immediate bottom-line impact.

FOUNDED 2019, Headquartered in Bengaluru	LEADERSHIP Harsha Kadimisetty (CEO) & Himavanth Jasti (CTO)
FINANCIAL STATUS Profitable, $13M Series A Led by Pavestone VC & Infosys	ENTERPRISE CUSTOMERS 40+ Global Giants
SPEND PROCESSED $45B+ Annually	AI NEGOTIATION Autonomous engine for touchless sourcing
CERTIFICATIONS SOC2 Type II, ISO 27001, GDPR Compliant	INFRASTRUCTURE AWS Multi-region with AES-256 Encryption

SECTION 02

Solution Scope for Al-Futtaim Group

ORCHESTRATION CHANNELS

Supplier Portal

WEB-BASED SELF SERVICE · ONBOARDING & BIDDING

Centralized hub for Al-Futtaim vendors to submit bids and track award status.

WhatsApp Business

DIRECT MESSAGING · APPROVAL & NOTIFICATION

Enables Al-Futtaim stakeholders to approve requisitions via instant messaging.

Email Parser

INBOUND PROCESSING · QUOTE SUBMISSION

Automatically extracts bid data from vendor emails into the Aerchain platform.

CAPABILITY MAPPING — AL-FUTTAIM GROUP REQUIREMENTS

SECTION 03

Implementation & Integration

INTEGRATION POINTS

Oracle Fusion ERP
8-10 Weeks

REST API / OIC
Syncing of Supplier Master, Chart of Accounts, Purchase Requisitions, and Awarded PO details.

IMPLEMENTATION ROADMAP

1

Discovery & Design

1–4

Process mapping, Oracle Fusion API mapping, Approval matrix definition

Business Requirement Document | Integration Specification

2

Configuration & Integration

5–12

Environment setup, i2a workflow configuration, Oracle Fusion connectivity

Configured Sandbox | UAT Readiness Report

3

UAT & Training

13–16

User acceptance testing, Admin training, Vendor onboarding sessions

UAT Sign-off | Training Manuals

4

Go-Live & Hypercare

17–20

Production deployment, Regional rollout (UAE/KSA), Post go-live support

Go-Live Report | Handover to Support

WAVE-BASED CHANNEL ROLLOUT

1 Month 5

UAE Core Operations - Indirect Spend

Digitized sourcing for UAE retail and corporate offices.

2 Month 7

KSA Operations & Direct Spend

Full cross-border procurement visibility and Oracle Fusion automation.

DELIVERY TEAM

Engagement Manager

Primary point of contact for Ahmed Al-Mansouri; oversees strategic alignment.

Solution Architect

Leads the Oracle Fusion integration and technical workflow design.

Implementation Consultant

Configures the i2a platform modules to meet Al-Futtaim's business rules.

Customer Success Manager

Ensures long-term adoption and value realization post-implementation.

Technical Lead

Manages API connectivity, security compliance, and data migration.

SECTION 04

Commercial Proposal

Scope: Procurement digitization for Al-Futtaim across UAE and KSA operations.

PLATFORM SUBSCRIPTION — YEAR 1

Annual recurring · Platform: $150K · Workflows: $258K · Integrations: $42K

IMPLEMENTATION & INTEGRATION

One-time implementation fee · 3-year engagement

YEAR 1 TOTAL INVESTMENT

By partnering with Aerchain, Al-Futtaim Group is not just buying a software tool but investing in a future-ready procurement ecosystem. For a group managing billions in spend, the i2a platform's ability to drive 5-15% in additional savings through AI-negotiation and process efficiency translates to a ROI that pays for the entire Year 1 investment within months.

Our deep integration with Oracle Fusion ensures that Al-Futtaim maintains a single source of truth while benefiting from the agility of an AI-native platform. This proposal outlines a path to transforming Al-Futtaim's procurement into a competitive advantage, ensuring transparency, compliance, and significant cost reduction across your UAE and KSA operations.
