SECTION 01

Introduction & About Aerchain

Aerchain is an AI-native autonomous procurement platform purpose-built for enterprise complexity. Founded in 2019 and headquartered in Bengaluru, India, Aerchain was architected from day one around agentic AI — multi-agent orchestration that manages the full sourcing lifecycle from intake through to award with minimal human intervention.

Aerchain integrates natively with enterprise ERP and intake systems — including Oracle Fusion and ServiceNow — operating as the intelligent sourcing orchestration layer between a client's intake workflow and their system of record. Iron Mountain's existing technology investments are preserved and strengthened, not replaced.

FOUNDED
2019 · Bengaluru, India

LEADERSHIP
Harsha Kadimisetty (CEO) · Himavanth Jasti (CTO)

FINANCIAL STATUS
Profitable & cash-flow positive · $13M Series A closing (Pavestone VC lead, Infosys strategic investor)

ENTERPRISE CUSTOMERS
40+ active enterprise customers (35+ direct, non-BPO) across manufacturing, FMCG, financial services, and global services

SPEND PROCESSED
$45B+ annually across the Aerchain customer base

AI NEGOTIATION — LIVE
Autonomous negotiation agent live at Diageo, AB InBev, Unilever, and NSE

CERTIFICATIONS
SOC2 Type II · ISO 27001 · GDPR-compliant

INFRASTRUCTURE
AWS multi-region · AES-256 encryption at rest · TLS 1.2+ in transit · RBAC with MFA · Immutable audit trail

SECTION 02

Solution Scope for Iron Mountain

INTEGRATION ARCHITECTURE

ServiceNow SPO
PR Intake & Triage

→

Aerchain Platform
RFx Orchestration · Supplier Selection · AI Negotiation · Award

→

Oracle Fusion
PO Creation & ERP

PRs flow in from ServiceNow SPO → Aerchain orchestrates sourcing and award → Award details pushed to Oracle Fusion for PO creation

ORCHESTRATION CHANNELS — YEAR 1

Tactical Sourcing
HUMAN-IN-THE-LOOP · FROM GO-LIVE
AI-generated RFx, supplier selection, and bid evaluation with sourcing manager review and approval prior to award. Covers all tactical tail spend transactions routed to Aerchain from ServiceNow SPO.

Autonomous Sourcing
FULLY AUTONOMOUS · POST-CALIBRATION
Full AI execution — intake to award with zero human touch for qualifying transaction types. Triggered once the platform has been calibrated against Iron Mountain's supplier base and category rules.

CAPABILITY MAPPING — IRON MOUNTAIN REQUIREMENTS

- ServiceNow SPO integration
- Oracle Fusion
- 60-country global footprint
- ~1,000 RFx events/month
- 50 named users
- Tactical tail spend routing
- Human-in-the-loop → Autonomous
- Spend under management up to $1B
- Security & governance

SECTION 03

Implementation & Integration

INTEGRATION POINTS

ServiceNow
4–6 weeks

INBOUND — PR TO AERCHAIN
Structured PR data handoff from ServiceNow triage to Aerchain sourcing engine. Includes metadata mapping, category classification, and routing rule configuration.

Oracle Fusion
4–6 weeks

OUTBOUND — AWARD TO ORACLE PO
Aerchain pushes awarded supplier, agreed terms, and line-item details to Oracle Fusion upon sourcing completion. PO creation remains within Oracle.

SSO / Identity
Within integration sprint

AUTHENTICATION
SSO integration for all 50 named users via Iron Mountain's identity provider. RBAC configuration per role.

16-WEEK ROADMAP

1 — Discovery & Design (Weeks 1–4)
ServiceNow and Oracle integration architecture design; policy and routing rule configuration; spend data ingestion; user role mapping; DOA matrix setup; category taxonomy alignment
Integration Blueprint · Channel Design Document · Spend Analysis Report

2 — Build & Configure (Weeks 5–10)
API integration build and testing (ServiceNow + Oracle); platform deployment; Tactical Sourcing workflow setup; supplier master data import; SSO configuration; UAT environment build
Configured Platform · Integration Test Report · User Training Materials

3 — Pilot & UAT (Weeks 11–13)
Go-live with pilot country/region; Tactical (human-in-the-loop) enabled; user acceptance testing; KPI validation; sourcing manager onboarding
Pilot Results Report · UAT Sign-off · Go-Live Readiness Assessment

4 — Rollout & Hypercare (Weeks 14–16)
Phased go-live across remaining countries; full Tactical Sourcing enabled globally; 4-week hypercare support; performance monitoring; Autonomous mode calibration begins
Go-Live Completion · Hypercare Report · BAU Transition Plan · Autonomous Readiness Assessment

WAVE-BASED CHANNEL ROLLOUT

1 — Q2 2026 (go-live)
Tactical Sourcing — Human-in-the-Loop
100% of eligible tail spend routed through Aerchain; sourcing managers reviewing and approving AI-generated RFx and awards

2 — Q3–Q4 2026
Autonomous Sourcing — Full AI execution
Autonomous mode activated per category as confidence thresholds are met; <5% manual touch rate on qualifying transaction types

3 — Year 2+ (2027)
Catalog & Strategic Sourcing
Full Aerchain suite activated; all sourcing channels live across 60 countries

DELIVERY TEAM

Aerchain Delivery Lead
End-to-end implementation accountability; Iron Mountain primary point of contact

Integration Architect
ServiceNow SPO and Oracle Fusion API integrations; enterprise middleware expertise

AI/ML Engineer
Agent configuration; LLM model tuning; autonomous negotiation model training

UX / Onboarding Lead
Platform UI configuration; end-user onboarding across 60 countries; training for 50 named users

Customer Success Manager
Named CSM from Day 1; 4-week hypercare post go-live; ongoing quarterly business reviews

SECTION 04

Commercial Proposal

Scope: Tactical and Autonomous Sourcing channels — covering all procurement transactions classified as tactical tail spend and routed from ServiceNow SPO through Aerchain's AI-driven sourcing, negotiation, and award engine to Oracle Fusion for PO creation. Catalog and Strategic Sourcing, e-invoicing, and full P2P replacement are explicitly out of scope.

PLATFORM SUBSCRIPTION — YEAR 1
$350,000
Annual recurring · 50 named users · up to $1B SUM · 12,000 RFx events/year · Tactical + Autonomous channels

IMPLEMENTATION & INTEGRATION
$300,000
16-week delivery incl. 4-week hypercare · ServiceNow SPO + Oracle Fusion integrations · 60-country rollout

YEAR 1 TOTAL INVESTMENT
Billed at project kick-off · Net 15
$650,000
Implementation fee breakdown: 80% Value Delivery & Implementation Services ($240,000) · 20% DevTech Configuration ($60,000)
