SECTION 01

Introduction & About Aerchain

Iron Mountain's global leadership in information management and digital transformation requires a procurement infrastructure that matches its scale and complexity. As you look to automate full procurement cycles globally, Aerchain's i2a (Indent-to-Award) platform offers an AI-native solution designed to eliminate manual bottlenecks while ensuring rigorous compliance across your diverse geographical footprint. By deploying our autonomous sourcing engines, Iron Mountain can transition from tactical execution to strategic oversight, leveraging real-time market intelligence and automated supplier negotiations.

Our platform is engineered to handle the high volume of complex RFxs and diverse spend categories inherent to Iron Mountain's operations. By integrating Aerchain into your existing ecosystem, Sreedhar, your team will gain unparalleled visibility into global spend, driving significant cost avoidance through our proprietary AI negotiation bots. This proposal outlines a roadmap to transform Iron Mountain's procurement into a competitive advantage, backed by our SOC2 Type II security framework and a proven track record of managing over $45B in annual spend for global enterprises.

FOUNDED 2019, Headquartered in Bengaluru, India	LEADERSHIP Harsha Kadimisetty (CEO) & Himavanth Jasti (CTO)
FINANCIAL STATUS Profitable, $13M Series A (Pavestone VC, Infosys strategic investor)	ENTERPRISE CUSTOMERS 40+ Global Enterprises
SPEND PROCESSED $45B+ Annually	AI NEGOTIATION Proprietary i2a Autonomous Sourcing Engines
CERTIFICATIONS SOC2 Type II, ISO 27001, GDPR Compliant	INFRASTRUCTURE AWS multi-region with AES-256 Encryption

SECTION 02

Solution Scope for Iron Mountain

ORCHESTRATION CHANNELS

Supplier Portal

WEB INTERFACE · ONBOARDING & BIDDING

Centralized hub for suppliers to submit quotes, manage profiles, and track awards.

AI Negotiation Bot

AUTONOMOUS EMAIL/CHAT · RFX NEGOTIATION PHASE

Executes multi-round price and term negotiations based on pre-set Iron Mountain logic.

Internal Stakeholder Bot

MICROSOFT TEAMS / SLACK · APPROVAL CYCLE

Triggers instant notifications and allows for 'one-click' approvals within existing communication tools.

CAPABILITY MAPPING — IRON MOUNTAIN REQUIREMENTS

SECTION 03

Implementation & Integration

INTEGRATION POINTS

Enterprise ERP
8-10 weeks

BI-DIRECTIONAL API
Syncing of master data (suppliers, GL codes, cost centers) and pushing awarded contracts/POs.

Single Sign-On (SSO)
2 weeks

SAML 2.0 / OKTA
Secure user authentication for all Iron Mountain employees globally.

Third-Party Risk Management
4 weeks

WEBHOOK / API
Automated pulling of supplier risk scores during the sourcing and onboarding phase.

IMPLEMENTATION ROADMAP

1

Discovery & Design
1–4

Process mapping, DoA definition, ERP integration mapping, UI/UX branding

Business Requirement Document (BRD) | Solution Design Document

2

Configuration & Integration
5–12

Platform setup, Workflow engine configuration, API development, UAT environment setup

Configured Platform Instance | API Integration Logs

3

UAT & Training
13–16

End-to-end testing, Power user training, Supplier onboarding pilot

UAT Sign-off | Training Manuals

4

Go-Live & Hypercare
17–20

Production deployment, Global rollout, 24/7 support during stabilization

Go-Live Report | Stabilization Certificate

WAVE-BASED CHANNEL ROLLOUT

1 Month 5

Core i2a implementation for North America and EMEA with ERP integration.
Centralized visibility and 100% digital sourcing for major regions.

2 Month 8

Expansion to APAC and LATAM with localized tax and language support.
Global standardization of procurement processes and data.

3 Month 12

Advanced AI Negotiation and Predictive Analytics rollout.
Maximized cost avoidance and automated strategic sourcing.

DELIVERY TEAM

Engagement Manager
Primary point of contact for Sreedhar Pathri, responsible for overall project success and executive alignment.

Solution Architect
Leads the design of the procurement workflows and ensures technical alignment with Iron Mountain's ERP.

Implementation Consultant
Handles the day-to-day configuration, business rule setup, and user acceptance testing.

Integration Engineer
Specialist focused on building and

Customer Success Manager
Post-implementation lead focused on

maintaining the secure data bridges between Aerchain and Iron Mountain systems.

user adoption, ROI tracking, and continuous improvement.

SECTION 04

Commercial Proposal

PLATFORM SUBSCRIPTION — YEAR 1

Annual recurring · Platform: $150K · Workflows: $428K · Integrations: $72K

IMPLEMENTATION & INTEGRATION

One-time implementation fee · 3-year engagement

YEAR 1 TOTAL INVESTMENT

By partnering with Aerchain, Iron Mountain is set to achieve a paradigm shift in procurement efficiency. The $941,200 Year 1 investment is designed to pay for itself through the deployment of our AI negotiation bots, which typically deliver a 6-12% reduction in tail spend and a 40% reduction in procurement cycle times. For an organization of Iron Mountain's scale, this translates into millions of dollars in direct bottom-line impact.

Beyond the immediate financial gains, Aerchain provides the digital 'connective tissue' for your global procurement operations. We eliminate the friction between intent and award, ensuring that every dollar spent is compliant, every negotiation is optimized by data, and every stakeholder has the visibility they need to make informed decisions. We are committed to supporting Sreedhar and the entire Iron Mountain team in building a world-class, autonomous procurement function.
